

Yazan Ayoub

Civil Engineer | BIM &
Engineering Automation

Al Azizyah | Doha, Qatar
(+974) 3366 2756
yazan_ayoub@hotmail.com

SUMMARY

Civil Engineer and full-stack developer with 4 years of project experience in Qatar's landmark infrastructure and Oil & Gas sectors. Proven expertise in site engineering, structural BIM, and building automation tools (C#, Revit API, Dynamo). Completed a selective leadership fellowship (Teach for Qatar) in June 2026, complementing technical skills with strategic communication, coaching, and adaptive problem-solving. Currently expanding proficiency in Angular, .NET, Unity, and game development. Applicant for a Master's in Mechanical Engineering at Qatar University, with a clear trajectory toward a PhD focused on computational engineering and design optimization. Actively seeking roles that merge software development, engineering analysis, and research.

EDUCATION

BACHELOR OF SCIENCE IN CIVIL ENGINEERING

University of Jordan | Amman, Jordan | Jan-2021

GPA: very good, 3.05/4.00

AL FORQAN HIGHSCHOOL: SCIENTIFIC APPROACH GPA: 97%

Doha, Qatar | Apr-2016

SKILLS & COMPETENCIES

Programming & Development

- C# / .NET, Angular (Full-Stack Web), Unity (Game Development), Object-Oriented Programming (OOP), API Integration & Automation.

Engineering & Project Management

- Site Supervision & Coordination, Technical Bid Review & Compliance, Value Engineering & Cost Optimization, Master Document Register (MDR) Management, Quality Assurance/QC, Stakeholder & Subcontractor Engagement, Quantity Take-Offs, Utility Networks (Wet/Dry, LV/MV/EHV).

Software & BIM

- Autodesk Revit (Structural), AutoCAD, Civil 3D, Navisworks, Dynamo, Revit API. Autodesk Certified Professional: Revit for Structural Design. BIM Coordination & Clash Detection.

Leadership & Professional

- Strategic Communication, Adaptive Problem-Solving, Data-Driven Instruction & Coaching, Team Coordination, Curriculum Design & STEM Integration.

Languages

- Arabic (Native), English (Full Professional – TOEFL iBT 93).

WORK HISTORY

TFQ FELLOW (MATH) - MOE & TFQ

Abu Baker Preparatory School

Doha, Qatar | August 2024 – Current

- Held a full-time leadership position in Qatar's public school system, designing and delivering mathematics curriculum to **100+ students** while engaging with parents, faculty, and school administration to drive student outcomes.
- Implemented **data-tracking systems** to monitor individual student progress, adapting instructional strategies in real-time and achieving measurable improvements in classroom performance.
- Completed a **structured 2-year leadership development pathway** with 20+ workshops on strategic communication, adaptive problem-solving, and team coordination
- Developed and delivered **STEM modules** integrating engineering design and computational thinking, connecting theoretical mathematics to real-world technological applications.
- Designed and facilitated **Project-Based Learning (PBL) initiatives**, guiding students from concept to functional prototype
- Leveraged training from the **QUESTA program (Qatar University & ExxonMobil Qatar)** to create interdisciplinary learning experiences that bridged mathematics, engineering, and technology.
- **Developed an educational game using Unity, currently being prepared for official publication via a dedicated website—demonstrating the application of C# programming and game design to create engaging learning tools.**

TECHNICAL ENGINEER - JEC

North Field South Onshore Project

Ras Laffan, Qatar | February 2023 - August 2024

Client: QE-LNG.

Contract value: 500,000,000 QAR.

- Led the preparation and submission of **50+ technical packages** to RLIC, achieving 100% compliance with territorial regulations and eliminating project delays on a **500M QAR** contract.
 - Managed Engineering Master Document Register (MDR) for **200+ deliverables**, ensuring alignment with project schedule and submission timelines.
 - Evaluated technical bids and IFC drawings from subcontractors, identifying and implementing **value-engineering opportunities** that optimized project costs without compromising quality.
 - Authored specification deviation requests and alternative solutions, securing client approvals that **streamlined project timelines** and reduced material procurement lead times.
 - Produced approved shop drawings that served as the primary construction reference, reducing on-site rework and ensuring design intent was accurately executed.
-

STRUCTURAL BIM ENGINEER - BIMTEC

Amman, Jordan | November 2022 - February 2023

- Planned and supervised BIM processes for **multiple structural engineering projects**, ensuring model integrity, and compliance with industry standards.
- Resolved **BIM** implementation issues including clash detection and model synchronization, maintaining workflow efficiency and preventing project delays.
- Analyzed architectural and structural plans to preemptively identify design conflicts, resolving issues before construction and **reducing costly rework**.
- Prepared accurate material estimates and **quantity take-offs** based on client-provided drawings, supporting procurement and cost estimation processes.

SITE ENGINEER - JEC

West Bay North Parks & Roads

Doha, Qatar | April 2021 - November 2022

Client: ASHGHAL - Public Works Authority.

Contract value: 720,000,000 QAR.

- Managed construction of a **19-hectare public park and beachfront** area along Doha Corniche, overseeing softscape, hardscape, and full underground utility networks on a **720M QAR** Ashghal project.
- Supervised demolition of existing structures and installation of **complex wet/dry utility networks**, telecommunications, CCTV, and Wi-Fi systems.
- Directed the beautification and upgrading of **7 km of major roads** (Dafna Road & service boulevards), including **13 signalized intersections** and high-end granite-paved finishes.
- Coordinated with **15+ stakeholders and subcontractors** under aggressive deadlines, successfully delivering the project ahead of schedule to ensure **World Cup 2022 readiness** for team and fan accommodations.
- **Implemented daily progress tracking and reporting systems**, providing real-time updates to project management and enabling rapid decision-making on critical path activities.

SITE ENGINEER - JEC

Hamad Port Strategic Food Security Facility

Mesaieed, Qatar | October 2020 - January 2021

Client: Hamad Port.

Contract value: 1,600,000,000 QAR.

- Contributed to the construction of a **530,000m² strategic food security facility**, 51 bulk storage silos, and waste-recycling units.
 - Assisted in the installation of a **full underground utility network**, including potable water, TSE, electrical (LV/MV/EHV), telecommunications, firefighting, and LPG
 - Supported site supervision and coordination for **road construction and bulk earthworks** across the extensive project area, ensuring alignment with project schedules and quality standards.
 - Collaborated with **multidisciplinary teams and subcontractors** to resolve on-site technical challenges.
-

SELECTED TECHNICAL WORK

- Architected and developed this highly responsive standalone portfolio platform from scratch using Angular 18, clean Bootstrap layout mechanisms, and modular advanced CSS engines to present cross-functional projects dynamically.
- Developed Revit API tools to automate engineering workflows and improve model efficiency.
- Created a Unity-based educational game applying C# programming demonstrating the integration of software development with technical problem-solving.
- Implemented data-tracking and analysis systems to monitor performance and support decision-making in both engineering and educational environments.

RESEARCH EXPERIENCE

UNIVERSITY OF JORDAN

Amman-Jordan | October 2020 - January 2021

- Conducted academic research on **steel fiber-reinforced lightweight concrete modified with nano-titanium dioxide**, investigating its structural behavior, durability, and environmental impact as a sustainable construction material.
 - Prepared a **comprehensive literature review** surveying 30+ academic papers, establishing the theoretical foundation and identifying research gaps in nano-modified concrete composites.
 - Designed and executed **experimental procedures**, including mix design, specimen preparation, and physical testing (compressive strength, flexural strength, and durability assessments).
 - Documented findings through **detailed data analysis and technical reporting**, contributing actionable insights on the viability of nano-modified lightweight concrete for sustainable construction applications.
-

TRAINING, COURSES, AND CERTIFICATIONS

References are available upon request.

CERTIFICATIONS & LICENSES

- Qatar University ExxonMobil STEM Teachers Academy (QUESTA) – Qatar University & ExxonMobil Qatar | 2024.
- Registered Engineer - Ministry of Municipality and Environment (MME), Qatar.
- Autodesk Certified Professional: Revit for Structural Design.
- TOEFL iBT Score: 93.

SPECIALIZED COURSES (BIM & Software)

- Revit Structural: Zero to Hero, BIM Engineer, BIM Specialist, BIM Manager, Families.
- Dynamo - BIM Developer.
- Navisworks - BIM Coordinator.
- The Complete C# and Object-Oriented Programming.
- Complete C# Unity 2D Game Development.
- Create Powerful Add-ins for AutoCAD, Civil 3D, Revit & Navisworks, Practical C# Code for Autodesk Software Step-by-Step.
- Build web applications with C#, ASP.NET 8, and Angular 18 to become a full stack web developer.
- C# + Revit.

PROFESSIONAL & SAFETY TRAINING

- Qatar Energy - Construction Passport (CPW).
- Vibrant - First Aid & Fire Warden.
- JMJ - Incident and Injury Free (IIF) Orientation & Supervisor Training.
- ICE - Transforming the Parking (Traffic Management).
