

YAZAN AYOUB

Doha, Qatar | (+974) 3366 2756 | yazan_ayoub@hotmail.com | yazanayoub.com

PROFESSIONAL SUMMARY

MME Registered Civil Engineer and Autodesk Certified Revit Structural Professional with over 4 years of proven field and technical engineering experience across Qatar's landmark infrastructure (1.6B QAR Hamad Port, 720M QAR Ashghal Corniche) and Oil & Gas sectors (500M QAR QE-LNG North Field South). Expert in managing site execution, technical submittals, Master Document Registers (MDR), and multi-disciplinary BIM clash detection. Combines heavy site supervision and value-engineering with computational automation skills (C#, Revit API, Dynamo) to streamline engineering deliverables, eliminate design clashes, and enforce 100% territorial regulatory compliance.

TECHNICAL SKILLS & LANGUAGE

BIM & Engineering Design: Autodesk Revit (Structural - Certified Professional), Navisworks, AutoCAD, Civil 3D, Dynamo, Revit API.

Site Engineering & Project Controls: Site Supervision & Coordination, Value Engineering, Quantity Take-Offs, Utility Networks (Wet/Dry, LV/MV/EHV), Master Document Register (MDR) Management.

Software & Automation: C# / .NET, Object-Oriented Programming (OOP), Angular (Full-Stack Web), API Integration.

Regulatory & Safety Credentials: MME Registered Engineer (Qatar), Qatar Energy (CPW), First Aid & Fire Warden Certified, Incident & Injury Free (IIF) Supervisor Trained.

Languages & Communication: Native Arabic, Full Professional English (TOEFL iBT: 93).

EDUCATION

UNIVERSITY OF JORDAN

Bachelor of Science in Civil Engineering

Amman, Jordan

Graduated January 2021

Academic Standing: Cumulative GPA: 3.07 / 4.00 (Very Good) | High School Scientific Stream: 97.0% (Al Forqan Highschool, Doha).

Research Experience: Conducted experimental research on steel fiber-reinforced lightweight concrete modified with nano-titanium dioxide evaluating compressive/flexural strength and durability.

WORK EXPERIENCE

TFQ (Teach for Qatar)
STEM Leadership Fellow

Doha, Qatar
Aug 2024 – Present

Selective National Leadership Fellowship: Selected for a competitive 2-year national leadership program aimed at developing high-impact leaders, driving educational transformation, and mentoring future STEM talent.

Stakeholder Governance & Communication: Direct multi-stakeholder alignment across Ministry officials, school leadership, and community bodies, managing complex public relations and high-stakes communication under strict regulatory guidelines.

Project Controls & Milestone Tracking: Designed and executed structured curriculum baselines, establishing data-driven tracking systems to monitor and optimize performance metrics across 100+ program participants.

Technical Pedagogy & Mentorship: Translated advanced engineering, physics, and mathematical concepts into digestible technical frameworks, fostering analytical problem-solving and computational thinking.

Leadership & Conflict Resolution: Managed daily team operations, public presentations, and conflict resolution under tight schedules, demonstrating adaptive leadership.

JEC (Al Jaber Engineering Company)
Technical Engineer

Ras Laffan, Qatar
Feb 2023 – Aug 2024

North Field South Onshore (Client: QE-LNG | Contract Value: 500M QAR)

Technical Submittal Governance: Authored and managed the submission of 50+ technical packages to Ras Laffan Industrial City (RLIC), achieving 100% regulatory compliance and eliminating critical-path delays across a 500M QAR contract.

Engineering Master Document Control: Controlled the Master Document Register (MDR) for 200+ deliverables, executing real-time schedule alignment across engineering, procurement, and construction baselines.

Value Engineering & Bid Reviews: Evaluated subcontractor technical bids and Issued for Construction (IFC) drawings, identifying deviation opportunities that optimized material procurement lead without compromising structural specifications.

Shop Drawing Execution: Produced and approved structural shop drawings serving as primary site construction baselines, cutting field rework through pre-execution spatial verification.

BIMTEC
Structural BIM Engineer

Amman, Jordan
Nov 2022 – Feb 2023

Multi-Disciplinary BIM Coordination: Supervised 3D structural Building Information Modeling (BIM) workflows across multi-story commercial assets in compliance Ashghal standards.

Clash Detection & Resolution: Conducted automated clash detection matrix reviews in Autodesk Navisworks and Revit, preemptively identifying and resolving 40+ structural and MEP (Mechanical, Electrical, Plumbing) conflicts prior to site mobilization.

Parametric Quantity Take-Offs: Extracted automated material quantities directly from parametric Revit models, increasing cost estimation accuracy for procurement teams.

JEC (Al Jaber Engineering Company)
Site Engineer

Doha, Qatar
Apr 2021 – Nov 2022

West Bay North Parks & Roads (Client: Ashghal | Contract Value: 720M QAR)

Infrastructure & Site Operations: Managed construction of a 19-hectare public park and beachfront area along Doha Corniche, overseeing softscape, hardscape, and full underground utility networks on a 720M QAR Ashghal project; directed the beautification and upgrading of 7 km of major roads (Dafna Road & service boulevards), including 13 signalized intersections and high-end granite-paved finishes.

Utility Network Execution: Supervised demolition of existing structures and installation of complex wet/dry utility networks, telecommunications, CCTV, and Wi-Fi systems.

Stakeholder Management & Progress Tracking: Coordinated with stakeholders and subcontractors under aggressive deadlines, successfully delivering the project ahead of schedule to ensure World Cup 2022 readiness for team and fan accommodations; implemented daily progress tracking and reporting systems, providing real-time updates to project management and enabling rapid decision-making on critical path activities.

Strategic Food Security Facility (Client: Hamad Port | Contract Value: 1.6B QAR)

Field Supervision: Contributed to the construction of a 530,000 sqm strategic food security facility, 51 bulk storage silos, and waste-recycling units; supported site supervision and coordination for road construction and bulk earthworks across the extensive project area, ensuring alignment with project schedules and quality standards.

Utility Infrastructure Installation: Assisted in the installation of a full underground utility network, including potable water, TSE (Treated Sewage Effluent), electrical (LV/MV/EHV), telecommunications, firefighting, and LPG distribution lines.

Multidisciplinary Technical Collaboration: Collaborated with multidisciplinary teams and subcontractors to resolve on-site technical challenges.

SELECTED TECHNICAL & AUTOMATION PROJECTS

ANGULAR FULL-STACK STANDALONE PORTFOLIO PLATFORM | yazanayoub.com

Architected and deployed a highly responsive single-page application from scratch using Angular 18, TypeScript, reactive state management, and custom SCSS engines to showcase cross-functional civil engineering, BIM, and software development deliverables.

REVIT API COMPUTATIONAL AUTOMATION SUITE | Independent Technical Project

Built standalone C# add-ins utilizing the Autodesk Revit Application Programming Interface (API) and Dynamo visual programming to automate, metadata synchronization, and drawing sheet compilation.

CERTIFICATIONS, COURSES & PROFESSIONAL TRAINING

CERTIFICATIONS & LICENSES

- Registered Civil Engineer: Ministry of Municipality and Environment (MME), Qatar
- Autodesk Certified Professional: Revit for Structural Design
- QUESTA STEM Teachers Academy: Qatar University & ExxonMobil Qatar (2024)
- Language Proficiency: TOEFL iBT Score: 93

SPECIALIZED TECHNICAL & SOFTWARE TRAINING

BIM & Computational Automation:

- Autodesk Revit Structural: Advanced Modeling, BIM Specialist, BIM Manager & Parametric Family Creation
- Dynamo BIM Developer: Visual Scripting & Workflow Automation
- Navisworks: BIM Coordination & Clash Detection
- Autodesk API Development: Building Custom C# Add-ins for Revit, AutoCAD, Civil 3D, and Navisworks

Full-Stack & Game Development:

- Full-Stack Web Development: C#, ASP.NET 8, and Angular 18 Architecture
- Object-Oriented Programming (OOP): Complete C# Engineering Applications
- Unity Engine: Complete C# 2D/3D Game Development

SAFETY & PROFESSIONAL FIELD TRAINING

- Qatar Energy (CPW)
- JMJ Leadership: Incident and Injury Free (IIF) Orientation & Supervisor Training
- Vibrant Training: First Aid & Fire Warden Certification
- Institution of Civil Engineers (ICE): Traffic Management & Parking Infrastructure Transformation
